JBIS journal of the british interplanetary society

Volume 40 1987

Editors

Space Stations	G.V. Groves
Mission Automation Systems	W.I. McLaughlin
Interstellar Studies	A.R. Martin
Soviet Astronautics	C.A. Simpson
Space Science	G. Alfrey
Space Technology	R.A. Flood
	G.V. Groves
Space Chronicle	G.V. Groves
Pioneering Space	E.J. Becklake
	G.V. Groves

AUTHOR INDEX

Anderman D.	Soviet Type G Booster – A Skeptical View	223
Ball M.	Dr Robert H. Goddard's First Successful Liquid-Fuelled Rocket as Launched at Auburn, Massachesetts on March 16, 1926	305
Ball M. & Turvey P.J.	American Interplanetary Society's No. 2 Rocket: Its Origins, Design, Construction and Launch	301
Barrett M.J.	The Estrack Network	259
Becklake E.J. & Turvey P.J.	Congreve at the Rotunda	291
Bedford D.K. & Simnett G.M.	MARTHE: A New Approach to X-Ray Imaging Telescopes	181
Bender D.F.	The Lunar Capture Phase of the Transfer of Asteroidal Material to Earth Orbit by Means of Gravity Assist Trajectories	129
Burkhalter B.B. & James G.S.	Enhancing the Quality of Space Education Through Programme Evaluation	519
Cannon H.I.	Symbolic Processing	437
Carter L.J.	The Valier Experiments	91
Clark P.S.	Soviet Launch Failures	527
Clark P.S.	Soviet Space Activity, 1985-1986	203
Clark P.S.	Topics Connected with the Soviet Manned Lunar Landing Programme	235
Dauncey S.R.	International Use of National Space Station Facilities	27
Deardorff J.W.	Examination of the Embargo Hypothesis as an Explanation for the Great Silence	373
Drinkenburg A.A.H.	Convection Under Microgravity and its Influence on Mass Transfer	125
Early J.T.	Space Transportation Systems with Energy Transfer and Force Beams	371
Elliott K.H. & Eyles C.J.	The University Telescope and Observatory	195
Erickson J.D.	Intelligent Systems and Robotics for an Evolutionary Space Station	471
Eyles C.J. et al	The Spacelab 2 Coded Mask X-Ray Telescope	159
Fearn D.G. & Wallace N.C.	Advanced Propulsion Systems for Space Station Applications	3
Ferns D.C., Lytton D.W. & Dillon M.	Payload Operations on the Columbus Polar Platform	33
Finnerty D.F., Martin J. & Doms P.E.	ASSET: An Application in Mission Automation for Science Planning	461
Flood R.A.	The Flight Control Team	257
Flury W.	Mission Analysis	271
Fogg M.J.	The Terraforming of Venus	551
Fowler M.J.	Space Station Applications: An Assessment of Opportunities in Biotechnology	43
French J.R. & Wright J.	Solar Sail Missions to Mercury	543
Garner J.T. & Jones M.	ETOL and ESA Communication Satellite Programmes	427
Gire B. & Schibler J.	The French National Space Programme 1950-1975	51
Goodall C.V. & Davies J.K.	Design and Testing of the ROSAT Wide Field Camera	173
Gordon S.	IMI Summerfield Rocket Motors and Propellants History and Development	311
Hansen J.R.	Transition to Space: A History of 'Spaceplane' Concepts at Langley Aeronautical Laboratory 1952-1957	67
Harper P.K.S. et al	The Flight of the Spacelab X-Ray Telescope	163
Harris P.R.	Innovations in Space Management	109
Harrison A.R.	Pixel-Based Reclassification of Classified Imagesat Different Spatial Resolutions	99
Harrison M.H.	Space Station: Opportunities for the Life Sciences	117
Hecks K.	Mechanical Design of the Eurostar Platform	133
Hempsell C.M.	Extending the Space Station Infrastructure	19
Herring J.R.H.	Simulating X-Rays in Space: The Long Vacuum X-Ray Facility at Birmingham University	189
Katz B. & Brooks R.N.	Understanding Natural Language for Spacecraft Sequencing	451
Lantz E.	A High Energy Launcher for Trans Atmospheric Vehicles	533
Lebon B.A.	Space Transportation Through Magnetic Shepherding of a Grazing Earth Ring: An Ecological Heart-Shaped Earth Ring by 2010?	365
Leggett M.J.	The Space Station in Chemical and Pharmaceutical Research and Manufacturing	11
Lum H. & Holcomb L.	Autonomous Intelligent Systems	443
Mazza C.	Data Processing Systems at ESOC	277
Minovitch M.A.	A Generalised Theory of Classical Rocket Propulsion for Future Space Travel	341
Mullinger D.E.	Towards a User-Friendly Space Station	39
Münch R.E.	The ESOC Flight Dynamics Activities	283
Ordway F.I.	Pioneering Commercial Rocketry in the United States of America: Thiokol's Reaction Motors Division 1958-1972, Part 3: RMD Operational History	389
Paptrony Z., Lehmann J. & Prytz J.	Interstellar Travel and Communication Bibliography – 1986 Update	353
Parfitt J. & Bond A.	The Soviet Manned Lunar Landing Programme	231
Peden J.C.M.	High Energy Data Analysis at Birmingham	185
Peebles C.	Setting Out For Space	89
Plevin J. & Lynn D.	Earth Observation from the Space Station	505
Powell J.W.	Navaho, The "Know-How" Missile	93
Powell J.W.	The Space Test Programme – An Update	513
Powell J.W. & Richards G.R.	The Orbiting Vehicle Series of Satellites	417

Scott R.F.	Instrument Checkout Facilities at the Mullard Space Science Laboratory	103
Simnett G.M.	Spacecraft Studies of the Sun and the Heliosphere	149
Skinner G.K. & Ponman T.J.	Coded Mask Telescopes for X-Ray Astronomy	169
Tabbert M.	Computing Facilities at ESOC	267
Turvey P.J.	Some Unusual Congreve Rockets	299
Wheeler R. & Snowdon P.	American Women in Space	81
Wilkins D.E.B.	Communications and Manned Spaceflight – The Vital Link	493
Wilkins D.E.B.	European Space Operations Centre	243
Willmore A.P.	Thirty Years of Space Research	147
Wilcox B.H. & Gennery D.B.	A Mars Rover for the 1990's	483
Winter F.H.	Pioneering Commercial Rocketry in the United States of America: Thiokol's Reaction Motors Division, 1958-1972, Part 4: RMD Project History	405

Subject Index

Advance Propulsion	3
AI Technology	443
Apollo Project	498
ASSET	461
ASTERIX	185
Asteroidal Material	129
Astronauts, American Women	81
Selection and Training	122
